NAME: OLUWAKEMI ADEWALE

COURSE: INFORMATION RESOURCE MANAGEMENT (IRM)

WEBSITE:

I created a website (Blog) that has to do with food; KEMI'S KITCHEN

- The preparation and types.
- The health benefits
- With time, different types of food will be available for order on my website.

HOW MY WEBSITE IS DESIGNED

The <u>HOME PAGE</u> is the introductory page and it introduces what my page is about, it consists of different pictures of food: how they are prepared: and the benefits. The home page also serves as a link to the other pages like the;

- SERVICES
- ARTICLE
- ABOUT
- CONTACT US

In addition, clicking on these links give a detailed information of what my website is about.

I made use of the Html, Css and Javascript, including the necessary images, which are all available in my website folder.

HTML: Was used for the structure and layout of the Web document by using a variety of tags and attributes.

JAVASCRIPT: Was used to create responsive, interactive elements for web pages

CSS: Was used for styling; including colors, layout, and fonts

HOW TO OPEN THE FOLDER

- It is a zipped folder and it has to be downloaded
- A new folder should be created on the desktop of your computer and the downloaded zipped folder has to be copied into it.
- And the content of the folder includes; image, img, styles, about, anim, article, home index, services.
- An editor has to be used to access any of the files, e.g; NotePad, Visual studio.
- Moreover, the "home" file can be clicked on in order to gain access to the site or kindly see below the link to access it from any other browser.
